

Graduate Mobile App Developer

HaulTech are looking to recruit a recent graduate or current undergraduate student to take on a 24-week project involving designing, planning, and implementing a mobile application to integrate with transport and logistics platforms.

This is a great opportunity for someone to join the newly formed Innovation Team, who develop brand new solutions using the latest technology. Working in a relaxed but productive small team of seasoned software engineers, the right candidate will ride shotgun on an exciting journey, and we might even let you choose the music! Don't just write code – make a difference.

Apply with your CV to jobs@haultech.co.uk for the attention of the Technical Manager.

Duties and Responsibilities

- Establish the company's current position and objectives for the project
- Perform feasibility and cost analysis on project
- Work with the Senior Leadership Team to create a project plan
- Work with the Technical Manager to design new mobile application (including deployment and implementation mechanisms)
- Present the design to, and seek approval from, the Board of Directors
- Develop a base framework for new mobile application
- Develop a proof-of-concept mobile application
- Maintain up-to-date terminology, concepts and best practices for coding mobile apps
- Work closely with colleagues to constantly innovate app functionality and design

Skills and Experience

- IT / Computing graduate or undergraduate
- Outstanding attention to detail
- Git source control
- Experience or knowledge of mobile application development (Xamarin is desired)
- Excellent communication, approachable, and comfortable asking for help
